

Robert Valmassoi

Sr. Full-stack Engineer | San Juan, PR + NYC, NY

orient_00agility@icloud.com | [linkedin.com/in/robertvalmassoi](https://www.linkedin.com/in/robertvalmassoi)

Education

Purdue University, School of Mechanical Engineering

Bachelor of Science in Mechanical Engineering *Aug 2014*

Skills

- **Languages & Frameworks:** Go (Golang), JavaScript (ES6+), TypeScript, modern React, Redux, Node.js, Jest, HTML, CSS, SASS, Angular, Swift, Objective-C
- **Practices:** REST, WebSockets, Webhooks, Responsive Web Design, Accessibility, Unit Testing, Integration Testing
- **Tools & Platforms:** macOS, Linux, GCP, AWS, Git, GitHub, GitLab, Webpack, Yarn, npm, ESLint, VS Code, Cursor, Xcode, Figma, Zeplin, Jira, Asana

Work Experience

Uber Technologies, Inc. — Nov 2021 - Feb 2026

Senior Software Engineer

Engineer on Uber Direct, the white-labeled delivery-as-a-service platform built on Uber Eats' courier network, serving enterprise and SMB clients (Apple, Walmart, and others) via API and a merchant dashboard. Worked full-stack in Go and React, collaborating across product, design, and operational teams. Mentored interns and junior engineers on technical and career growth.

Partner Experience

- Built merchant-facing dashboard features including self-serve onboarding, address autocomplete, and internal user emulation tooling
- Delivered self-serve CC/Invoice billing setup (15d to 1h) by eliminating manual ops steps
- Implemented order history search/filtering to improve merchant operations and support workflows
- Created analytics funnel reporting to surface onboarding drop-off insights, enabling data-driven product improvements
- Led large-scale architectural refactors, improving codebase maintainability and developer velocity

Delivery Experience

- Reduced courier fraud by implementing geolocation restrictions and PIN code handshake requirements
- Designed greenfield feedback API in collaboration with cross-functional stakeholders, enabling a new data collection channel across the delivery lifecycle

Courier Pick and Pack

- Delivered foundational features for grocery deliveries, directly unblocking pending commercial deals
- Shipped real-time item replacement on consumer-facing delivery tracking webpage, tackling challenging authentication complexities
- Opened courier to end-customer communication channels, improving item find rate for grocery deliveries
- Tuned ETA model to be shopping-time aware, exposing improved delivery estimates in the quote API response

tZERO of Overstock.com — Nov 2016 - Oct 2021

Director of Blockchain Development

- Led design and execution of crypto cold storage solution for company's Security Token Offering/capital raise
- Documented procedure for nontechnical executives, which secured \$72M of BTC and ETH by utilizing Shamir's Secret Sharing and a Hierarchical-Deterministic Hardware Wallet
- Supported CFO with liquidation on exchanges and OTC trades
- Architected security token smart contracts — the company's core IP and technical foundation of its STO platform
- Fostered alignment of engineering, business, and legal teams to define STO requirements and technical boundaries
- Inventor on an issued patent: "Self-enforcing security token implementing smart-contract-based compliance rules consulting smart-contract-based global registry of investors"

Software Development Team Lead

- Led onboarding and trading platform team of developers, DevOps, and QAs
- Re-architected the Securities Lending Platform from a view-only market data feed to have actionable order entry by reusing company's matching engine service
- Collaborated closely with PMs/designers on product direction; managed code progression and deployments
- Drove technical sales demos of onboarding and trading platforms to prospective SaaS clients

Senior Front-end Developer

- Delivered platform launch, under a tight deadline, of world's first publicly traded security on a blockchain
- Led refactoring from jQuery single-page app to React with Redux, improving scalability and maintainability
- Established coding standards, documentation, and test coverage practices

Jade Labs, LLC — *Dec 2010 - Feb 2018*

Owner/Developer

- Founded and operated a web/software studio serving small businesses across multiple states; owned scoping, delivery, and client relationships
- Built and ran an annual internship program; recruited and mentored up to 25 international engineering interns
- Negotiated and delivered \$100K+ in contracts for a custom mobile application that streamlined a client's workflow

Space Cash App — *Dec 2013 - Jan 2019*

Designer and Developer

- Built and maintained a Bitcoin/altcoin price ticker iOS app as sole developer; maintained a 4.5/5 user rating
- Early mover to support 100+ cryptocurrencies, filling an unmet market need
- Shipped ongoing releases to accommodate SDK/API changes and deliver new features based on user feedback
